MATLAB® Essentials William Bober, 2017-09-11 All disciplines of science and engineering use numerical methods for complex problem analysis, due to the highly mathematical nature of the field. Analytical methods alone are unable to solve many complex problems engineering students and professionals confront. Introduction to MATLAB® Programming for Engineers and Scientists examines the basic elements of code writing, and describes MATLAB® methods for solving common engineering problems and applications across the range of engineering disciplines. The text uses a class-tested learning approach and accessible two-color page design to guide students from basic programming to the skills needed for future coursework and engineering practice.

Blaze Your Own Trail Rebekah Bastian, 2020-02-11 So many women enter their adult lives believing that they should know where they are going and how to get there. This can make life decisions feel intimidating and overwhelming. While some choices that lie ahead are fairly predictable, such as those surrounding career, partnership, and motherhood, the effects of these choices can lead to more complicated and unexpected turns that are seldom discussed. Rather than suggesting a rule book, Rebekah Bastian, vice president at Zillow and recognized thought leader, inspires you to Blaze Your Own Trail. “I have the benefit of being a living example of crooked paths, magnificent screw-ups, and shocking successes,” she writes. Through storylines and supportive data that explore workplace sexism, career changes, marriage, child-rearing, existential crises, and everything in between, you will learn to embrace and feel less alone in your own nonlinear journey. Even better, you can turn back decisions and make different ones. Blaze Your Own Trail includes nineteen possible outcomes and many routes to get there. You will find that you have the strength to make it through any of them.

with SSH Building secure VPNs with OpenVPN, and a Linux PPTP VPN server Single sign-on with Samba for mixed Linux/Windows LANs Centralized network directory with OpenLDAP Network monitoring with Nagios or MRTG Getting acquainted with IPv6 Setting up hands-free networks installations of new systems Linux system administration via serial console And a lot more. My Tank Is Fight! Zack Parsons,2006-10-01 Soldiers that fly! Tanks that fly! Cruisers that . . . sink! What Fight Have Been My Tank Is Fight! contains a humorous and exciting examination of twenty real inventions from World War II that never saw the light of day. Each entry includes full technical details, a complete development history, in-depth analysis, and a riveting fictionalized account of the invention's success or failure on the battlefield. Lavish color artwork and technical illustrations are falling from the pages of this book like toenails from a trench foot. Dive under the Atlantic in the turreted U-Cruiser, or rule its surface from an aircraft carrier made out of ice. Shred bomber formations in a high-performance flying wing fighter and then rocket to your untimely end from the cockpit of your very own suicide missile. We've got a pair of German armored land vehicles for you that are so large they had to be powered by naval engines! My Tank Is Fight! delivers the thrilling action of the Second World War as it might have been with a touch of humor and a lack of class. Only the slow-witted are reading this anywhere other than in line at the cash register. Ask an adult to help you if you're still not sure you want to buy the book.

Peter Kay's Phoenix Nights Peter Kay,2003 From the Channel 4 comedy series of the same name, Phoenix Nights is set in a Bolton working man's club. Toy Deer of the Florida Keys Dorothy Francis,2000 Gramp! Tim called. Gramp, come quick! There's a baby deer right in your backyard. Gramp hurried to Tim's room. Right, Tim. It's a fawn. Why, it's so tiny! I could hold it in my hands. Could I keep it as a pet? Tim asked. Gramp smiled. No, Tim. It's unwise to keep a wild creature as a pet. And it's against the law here on Big Pine Key. Shouldn't we take him inside to keep him safe? No, Gramp answered. The fawn may only seem to be alone. But its mother is probably close by. Tim wanted to believe Gramp. But Blackie was so tiny. How would Blackie survive so many dangers? Book jacket.

Polish Migration to the UK in the 'New' European Union Kathy Burrell, 2016-04-22 Since the 2004 enlargement of the European Union over half a million Polish migrants have registered to work in the United Kingdom, constituting one of the largest migration movements in contemporary Europe. Drawing on research undertaken across a wide range of disciplines - history, economics, sociology, anthropology, film studies and discourse analysis - and focusing on both the Polish and British aspects of this phenomenon - both emigration and immigration - this edited collection investigates what is actually new about this migration flow, what its causes and consequences are, and how these migrants' lives have changed by moving to the United Kingdom. As the first book to deal with Polish migration to the United Kingdom, *Polish Migration to the UK in the 'New' European Union* will appeal to scholars across a range of social sciences, whose work concerns migration and the migration process.

Getting Started with Mac OS X Leopard Justin Williams, 2007-11-12 This book offers a simple to read, fast way to discover all that's new in Mac OS X Leopard, and how to make the most of it, whether you are new to the Mac, or simply upgrading from a previous version of Mac OS X. New additions to the operating system are showcased, including the changes to the Dock and Finder, and new features such as Stacks, Cover Flow, and Quick View introduced, before the book moves on to give a basic guide to using the Mac—creating folders, moving files, installing applications, and burning CDs, for example. Communication and organization are covered with chapters on Mail and iChat, including information on how to get the most of the latest features such as creating to-do items, and reading RSS feeds in Mail, and sharing screens in iChat. There are chapters that cover Spaces and Time Machine, perhaps the most talked about feature in this release of Mac OS X. iLife is fully dealt with, with discrete chapters on iTunes, iPhoto, iMovie and iDVD, and GarageBand, followed with a chapter on iWeb showing how to share your creations, and using Front Row to be entertained by them. The final chapters of the book give an overview of some more advanced areas of using a Mac, namely how Mac OS X itself works, and also how to develop for the Mac. These chapters are intended only to give a glimpse as to the possibilities—the book is primarily aimed at regular

users. A number of appendices conclude the book, one providing a guide to those users who are switching from Windows, and another that contains a useful list of recommended Mac applications for a wide array of uses. In the authors own words, This book isn't a bible or tome about how to do anything and everything with Mac OS X. Instead, its goal is to introduce the major features of Mac OS X so you can be up and running quickly.

Brain Droppings George Carlin,2023-10-10 Sometimes, a little brain damage can help. A book of original humor pieces by beloved comic George Carlin. Filled with thoughts, musings, questions, lists, beliefs, curiosities, monologues, assertions, assumptions, and other verbal ordeals, Brain Droppings is infectiously funny. Also included are two timeless monologues, A Place for Your Stuff and Baseball-Football. Readers will get an inside look into Carlin's mind, and they won't be disappointed by what they find: I buy stamps by mail. It works OK until I run out of stamps. What year did Jesus Christ think it was? A tree: first you chop it down, then you chop it up. Have you ever noticed the lawyer is always smiling more than the client? I put a dollar in one of those change machines. Nothing changed. If you ever have chicken at lunch and chicken at dinner, do you ever wonder if the two chickens knew each other? Carlin demolishes everyday values and yet leaves you laughing out loud.
