Pieter Bruegel and the Art of Laughter Walter S. Gibson,2006-02 In this delightfully engaging book, Walter S. Gibson takes a new look at Bruegel, arguing that the artist was no erudite philosopher, but a man very much in the world, and that a significant part of his art is best appreciated in the context of humour.

Playthings in Early Modernity Allison Levy,2017-02-22 An innovative volume of fifteen interdisciplinary essays at the nexus of material culture, performance studies, and game theory, Playthings in Early Modernity emphasizes the rules of the game(s) as well as the breaking of those rules. Thus, the titular plaything is understood as both an object and a person, and play, in the early modern world, is treated not merely as a pastime, a leisurely pursuit, but as a pivotal part of daily life, a strategic psychosocial endeavor.

Carnivore Behavior, Ecology, and Evolution John L. Gittleman, 2019-05-15 The mammalian order Carnivora is characterized by an incredible range of morphological, ecological, and behavioral variation. Carnivores can be as small as the 100-gram least weasel or as large as the 800-kilogram polar bear. Their reproductive rate can vary from one offspring every five years, as with some black bears, to three litters a year, as with the dwarf mongoose. Group sizes can be traced along a wide continuum, from the solitary ermine to the monogamous golden jackal to the large extended packs of as many as 80 spotted hyenas. Until recently the general habits of most wild carnivore species were inadequately understood. In the last decade, however, improved technologies, including the use of radiotelemetry and night-vision scopes, have led to many important discoveries. This book is at once a critical summary and an evaluation of current research on carnivores. A worthy successor to R.F. Ewer's monumental volume, *The Carnivores* (Cornell University Press), it is the work of 30 leading carnivore biologists, who here assemble comparative data on the basic anatomical, behavioral, ecological, physiological, reproductive, and evolutionary characteristics of this group. After a general introduction to the Carnivora, the volume is divided in three parts, each of which begins with a brief introduction outlining its main themes. Part I, Behavior, covers acoustic and olfactory communication, behavioral development, behavioral ecology of canids and hyaenids, modes of solitary living, and group living. In Part II, Ecology, topics include feeding ecology of the giant panda and Asiatic black bear, adaptations for aquatic living, ecological constraints on predation in felids, consequences of small size in mustelids, rate of basal metabolism and food habits, and reproductive output. Part III, Evolution, deals with the morphological approaches to phylogeny, and the fossil record. An appendix presents a complete classification of the Carnivora, including topics of continuing controversy. Highlighting recent developments in the study of the Carnivora and areas for further research, this broad synthesis will be of great value of students and researchers in animal behavior, behavioral ecology, wildlife ecology, mammalogy, paleontology, systematics, and evolution theory. It will also encourage realistic conservation programs to manage rapidly diminishing populations and will elucidate particular features of the carnivores for nonspecialist readers.

Walker's Carnivores of the World Ronald M. Nowak, 2005-01-07 Although they are highly intelligent, ruthless predators, carnivores are increasingly rare. From the dwarf mongoose to the polar bear, carnivores are at once respected and misunderstood, invoking both fear and curiosity in the humans with whom they share their world. Ronald M. Nowak celebrates these fascinating mammals in *Walker's Carnivores of the World*. This comprehensive guide, featuring 225 illustrations, covers the world's eight terrestrial families of carnivores. Each generic account comprises scientific and common names, number and distribution of species, physical attributes, measurements, hunting and social activity, reproduction, habitat, population dynamics, longevity, and status of threatened species. A thought-provoking overview by David W. Macdonald and Roland W. Kays is packed with results of the latest field and laboratory research on topics ranging

from evolutionary history to the adaptive value of fur patterns. Emphasizing the interplay of social life, morphology, and predatory behavior, it provides an up-to-date panorama of the world's carnivores.

The Hippos S.K. Eltringham,2010-01-31 Hippos are unusual in being genuinely amphibious. This has a fundamental effect on their physiology and way of life. Following a general introduction, there is a detailed description of hippo anatomy and physiology, including facts about their skin structure and physiology. Subsequent chapters are devoted to their social biology and ecology, including descriptions of their breeding and feeding ecology. Several extraordinary instances of carnivory, including an instance of cannibalism, are described. This book closes with three chapters devoted to the results of the author's survey on the distribution and abundance of the common hippo throughout Africa.

Falling Angel William Hjortsberg,2012-03-13 Edgar Award Finalist: The hunt for a vanished singer leads a detective into the depths of the occult in this "terrific" novel (Stephen King). Big-band frontman Johnny Favorite was singing for the troops

when a Luftwaffe fighter squadron strafed the bandstand, killing the crowd and leaving the singer near death. The army returned him to a private hospital in upstate New York, leaving him to live out his days as a vegetable while the world forgot him. But Louis Cyphre never forgets. Cyphre had a contract with the singer, stipulating payment upon Johnny's death—payment that will be denied as long as Johnny clings to life. When Cyphre hires private investigator Harry Angel to find Johnny at the hospital, Angel learns that the singer has disappeared. It is no ordinary missing-person's case. Everyone he questions dies soon after, as Angel's investigation ensnares him in a bizarre tangle of black magic, carnival freaks, and grisly voodoo. When the sinister Louis Cyphre begins appearing in Angel's dreams, the detective fears for his life, his sanity, and his soul. Falling Angel was the basis for the Alan Parker film *Angel Heart*, starring Mickey Rourke, Robert De Niro, and Lisa Bonet. This ebook features an illustrated biography of William Hjortsberg including rare photos from the author's personal collection.

Serengeti II A. R. E. Sinclair, Peter Arcese, 1995-08 *Serengeti II: Dynamics, Management, and Conservation of an Ecosystem* brings together twenty years of research by leading scientists to provide the most most thorough understanding to date of the spectacular Serengeti-Mara ecosystem in East Africa, home to one of the largest and most diverse populations of animals in the world. Building on the groundwork laid by the classic *Serengeti: Dynamics of an Ecosystem*, published in 1979 by the University of Chicago Press, this new book integrates studies of the ecosystem at every level—from the plants at the bottom of the visible food chain, to the many species of herbivores and predators, to the system as a whole. Drawing on new data from many long-term studies and from more recent research initiatives, and applying new theory and computer technology, the contributors examine the large-scale processes that have produced the Serengeti's extraordinary biological diversity, as well as the interactions among species and between plants and animals and their environment. They also introduce computer modeling as a tool for exploring these interactions, employing this new technology to test and anticipate the effects of social, political, and economic changes on the entire ecosystem and on particular species, and so to shape future conservation and management strategies.

Anvil! Lips Reiner, Robb Reiner, 2009-10-20 In the early seventies, when Led Zeppelin and Black Sabbath ruled the world, Steve "Lips" Kudlow and Robb Reiner, two young Jewish boys from the northern suburbs of Toronto, vowed to rock together forever. A decade later, their band Anvil released one of the heaviest records in music history, *Metal on Metal*, which influenced a whole musical generation, including the world-dominating bands Metallica, Slayer, and Anthrax. Yet while these bands went on to sell millions of records, Anvil slipped straight into obscurity. Was it too much sex and drugs and not enough rock 'n' roll? Was it the menagerie of pets that accompanied them on tour? Their uncanny knack for setting themselves on fire whenever a record company executive was watching? Now, almost thirty years later, like a real-life Spinal Tap, these unlikely musical heroes are still rocking, and still chasing their dream. Written in their own words, *Anvil: The Story of Anvil*

charts the rise, fall, and eventual triumph of two men whose indestructible friendship, talent, and determination took them on a unique journey in the world of rock. A bittersweet and frequently hilarious hymn to the human spirit, played loud in power chords, it is a story of true brotherly love, living the dream, and never giving up. Praise for the film documentary *Anvil: The Story of Anvil*:

Transnational Death Samira Saramo, Eerika Koskinen-Koivisto, Hanna Snellman, 2019-09-10 *Transnational Death* brings together eleven cutting-edge articles from the emerging field of transnational death studies. The collection highlights European, Asian, North American, and Middle Eastern perspectives, and reflects on people's changing experiences with death in the context of migration over time. The collection begins with a thematic assessment of transnational death studies, and then examines case studies, divided into Family, Community, and Commemoration sections. Together, the chapters provide new insights on issues including identity and belonging, community reciprocity, transnational communication, and spaces of mourning and commemoration. The collection is edited by Dr. Samira Saramo (University of Turku), Dr. Eerika Koskinen-Koivisto (University of Jyväskylä), and Professor of Ethnology Hanna Snellman (University of Helsinki).
