**Banjo Roots and Branches** Robert B Winans, 2018-07-30 The story of the banjo's journey from Africa to the western hemisphere blends music, history, and a union of cultures. In *Banjo Roots and Branches*, Robert B. Winans presents cutting-edge scholarship that covers the instrument's West African origins and its adaptations and circulation in the Caribbean and United States. The contributors provide detailed ethnographic and technical research on gourd lutes and ekonting in Africa and the banza in Haiti while also investigating tuning practices and regional playing styles. Other essays place the instrument within the context of slavery, tell the stories of black banjoists, and shed light on the banjo's introduction into the African- and Anglo-American folk milieus. Wide-ranging and illustrated with twenty color images, *Banjo Roots and Branches* offers a wealth of new information to scholars of African American and folk musics as well as the worldwide community of banjo aficionados. Contributors: Greg C. Adams, Nick Bamber, Jim Dalton, George R. Gibson, Chuck Levy, Shlomo Pestcoe, Pete Ross, Tony Thomas, Saskia Willaert, and Robert B. Winans.

**Experiencescapes** Tom O'Dell, Peter Billing, 2005 Experiences have become the hottest commodities the market has to offer. No matter where we turn, we are constantly inundated by advertisements promoting products that promise to provide us with some ephemeral experience that is newer, better, more thrilling, more genuine, more flexible, or more fun than anything we have previously encountered. In turn, consumers themselves are increasingly willing to go to great lengths, invest large sums of money, and take great risks to avoid the beaten track and experience something new. Working with an interdisciplinary approach, this book critically analyzes the significance this market for experiences (and interest in them) is having as a generative motor of cultural and socioeconomic change in modern society.--Jacket.

**The Roman Villa in the Mediterranean Basin** Annalisa Marzano, Guy P. R. Métraux, 2018-04-30 This volume offers a comprehensive survey of Roman villas in Italy and the Mediterranean provinces of the Roman Empire, from their origins to the collapse of the Empire. The architecture of villas could be humble or grand, and sometimes luxurious. Villas were most often farms where wine, olive oil, cereals, and manufactured goods, among other products, were produced. They were also venues for hospitality, conversation, and thinking on pagan, and ultimately Christian, themes. Villas spread as the Empire grew. Like towns and cities, they became the means of power and assimilation, just as infrastructure, such as aqueducts and bridges, was transforming the Mediterranean into a Roman sea. The distinctive Roman/Italian villa type was transferred to

the provinces, resulting in Mediterranean-wide culture of rural dwelling and work that further unified the Empire.

*Zoltan Kodaly's World of Music* Anna Dalos, 2020-09-08 Hungarian composer and musician Zoltán Kodály (1882–1967) is best known for his pedagogical system, the Kodály Method, which has been influential in the development of music education around the world. Author Anna Dalos considers, for the first time in publication, Kodály's career beyond the classroom and provides a comprehensive assessment of his works as a composer. A noted collector of Hungarian folk music, Kodály adapted the traditional heritage musics in his own compositions, greatly influencing the work of his contemporary, Béla Bartók. Highlighting Kodály's major music experiences, Dalos shows how his musical works were also inspired by Brahms, Wagner, Debussy, Palestrina, and Bach. Set against the backdrop of various oppressive regimes of twentieth-century Europe, this study of Kodály's career also explores decisive, extramusical impulses, such as his bitter experiences of World War I, Kodály's reception of classical antiquity, and his interpretation of the male and female roles in his music. Written by the leading Kodály expert, this impressive work of historical and musical insight provides a timely and much-needed English-language treatment of the twentieth-century composer.

*Introduction to Applied Probability* Paul E. Pfeiffer, David A. Schum, 2014-05-10 *Introduction to Applied Probability* provides a basis for an intelligent application of probability ideas to a wide variety of phenomena for which it is suitable. It is intended as a tool for learning and seeks to point out and emphasize significant facts and interpretations which are frequently overlooked or confused by the beginner. The book covers more than enough material for a one semester course, enhancing the value of the book as a reference for the student. Notable features of the book are: the systematic handling of combinations of events (Section 3-5); extensive use of the mass concept as an aid to visualization; an unusually careful treatment of conditional probability, independence, and conditional independence (Section 6-4); the resulting clarification facilitates the formulation of many applied problems; the emphasis on events determined by random variables, which gives unity and clarity to many topics important for interpretation; and the utilization of the indicator function, both as a tool for dealing with events and as a notational device in the handling of random variables. Students of mathematics, engineering, biological and physical sciences will find the text highly useful.

**Studies in Semitic Vocalisation and Reading Traditions** Aaron Hornkohl, Geoffrey Khan, 2020-06-01 This volume brings together papers relating to the pronunciation of Semitic languages and the representation of their pronunciation in written form. The papers focus on sources representative of a period that stretches from late antiquity until the Middle Ages. A large proportion of them concern reading traditions of Biblical Hebrew, especially the vocalisation notation systems used to represent them. Also discussed are orthography and the written representation of prosody. Beyond Biblical Hebrew, there are studies concerning Punic, Biblical Aramaic, Syriac, and Arabic, as well as post-biblical traditions of Hebrew such as

piyyut and medieval Hebrew poetry. There were many parallels and interactions between these various language traditions and the volume demonstrates that important insights can be gained from such a wide range of perspectives across different historical periods.

**Inside Installations** Tatja Scholte, Glenn Wharton, 2011 Anything is possible in installation art. The typically short lifespan of the materials and techniques used and the intended experience can be endless, often to the despair of the custodian of the work. The processes involved in preserving this complex form of art, reinstalling it, finding ways to recreate the experience over and over again, as well as the decisionmaking that underlies these processes, form the backbone of this book. What did the artist originally intend and how has that concept been realised in the past? How can one preserve and document the installation? What relation exists between the components and the space, and what is the spectator's part in the work? Questions of this kind are examined in connection with a number of case studies. At the same time, it reports on the results of an extensive research project *Inside Installations* (2004-2007) carried out by an international group of custodians active in the conservation of contemporary art. Tatja Scholte is programme manager at the Cultural Heritage Agency of the Netherlands (RCE) and specialised in the theory of contemporary art conservation. Dr. Glenn Wharton serves as Media Conservator at the Museum of Modern Art in New York. He is also on faculty in the Museum Studies Program at New York University, and was the founding Executive Director of INCCA-NA, the North American group of the International Network for the Conservation of Contemporary Art. Publisher's note.

**Everyday Creativity** Ruth Richards,2017-01-14 FIRST OF A SERIES OF FOUR EVERYDAY CREATIVITY (TM) BOOKS, this 1994 lost book, by a prizewinning 21st century expert, was recently discovered. It introduces the vital concept of EVERYDAY CREATIVITY, our originality of everyday life, often lost to those who think creativity is only about arts or sciences, or a few famous people. This is our human birthright-creativity as a process and way of life whether managing an office, organizing a fundraiser, parenting, teaching, gardening, fixing the car-or creating that painting. It is less what we do than how we do it. With creativity as a process WE TOO ARE THE CREATION; we come alive, find richness, inspiration, presence, joy, new realms of health-physical and psychological-and in the best cases, also intimacy, love, caring, a greater connection, and new views of world and self. Here too is help for those with anxiety, depression, a range of conflicts, parents wanting the best for their kids, and each of us seeking happiness and meaning in life.
